Written narrative

The following dimensional standards and physical requirements can not be met.

1.

4-03-03-02-01-5d-i.-ii.

d. Size: i. Attached or Internal. ADUs shall not exceed 40% of the principal dwelling unit's residential floor area in addition to the underlying development standards for the lot, including, but not limited to, lot coverage, height, and setback requirements for the zone in which they reside.

ii. Detached. ADUs shall not exceed 1,500 square feet of the residential floor area or 40% of the primary dwelling unit's residential floor area, whichever is less.

2.

3-13-06-04-03

MINIMUM SIDE SETBACK The minimum side setback for accessory structures in a Residential-1-C District shall be five (5) feet.

3.

3-13-06-04-04

MINIMUM REAR SETBACK The minimum rear setback for accessory structures in a Residential-1-C District shall be five (5) feet. If the rear property line fronts a public right-of-way where access is taken, the rear setback shall be twenty (20) feet.

Why is the property unable to meet this standard?

The existing accessory recreational building, which was permitted and constructed in accordance with all building standards at the time of construction, does not meet current setbacks or the 40% residential floor plan requirement. We are requesting the ability to use the current accessory living area building as an ADU. The residential floor area of the current accessory living has a floor area of 61% of the primary dwelling's residential floor area where the maximum allowed ADU residential floor area is 40%. The floor area of the main structure is 1446' and the existing accessory unit has a floor area of 900'.

The property is set back to 3' to the rear lot line and 4.8' to the side lot line to the south lot. Current build guidelines for new ADU's require a 5' set back on all lot lines.

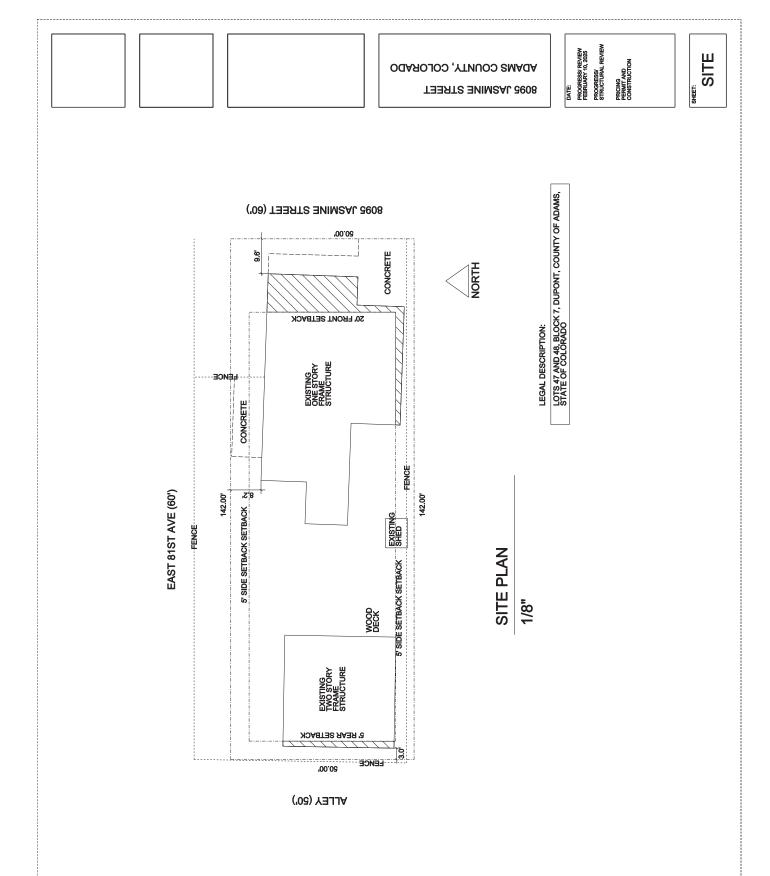

To whom it may concern,

I am writing on behalf of the current owners of 8095 Jasmine St Jose Alberto Garcia and Eulalia Garcia to request a change of use for an existing structure located at 8095 Jasmine St Dupont CO 80031. Currently, there is a fully permitted and inspected accessory building located in the rear of the property. This building was built in the early 2000's and passed final inspection on permit B02-1301 on 3-6-2007 per Admas county building records. We have included every building permit on record in this application. The permitted use is currently a detached recreational building not to be used as a residential dwelling.

We believe this property and more specifically this building meets the criteria for a zoning variance given the changes in zoning laws regarding accessory dwelling units. We are formally requesting a zoning variance to allow the current building to be used as an accessory dwelling unit as we believe it meet the criteria required for approval.

- 1. The lot has a fully permitted and inspected existing building that does not meet current zoning standards.
- 2. The property owner should be able to convert this existing building into a conforming ADU use based on the current change in ADU zoning and permitting.
- 3. The variance will give no special privilege to the property owner as the building is existing, permitted, inspected, and met prior building standards.
- 4. The property cannot be reasonably rebuilt to fit the new building standards. The property conformed with the existing building standards when it was built.
- 5. The building was built and according to all applicable laws and codes when it was constructed. The change in the current housing environment and new

- 7. The building is currently used as an accessory recreational unit changing the use to an Accessory dwelling unit will not impair the public good.
- 8. Accessory Dwelling use is allowed in the current zone district R-1-C

RE: 8095 Jasmine Street

Dear Property Owners:

Please be advised that building permit, **BDP02-1301**, issued on June 12, 2002 for a detached recreation building, has expired. Our records indicate there have been not any inspections on the building since March 26, 2003.

This is in violation of the Adams County Development Standards and Regulations, Section 2-02,1.b and the 1997 Uniform Building Code Section 106.4.4.

You have sixty (60) days, until **April 30, 2004**, to renew your permit for a fee of **\$296.50**, which is half of the original permit fee. After that date, if the violation still exists, you may be served with a summons and complaint requiring you to appear in County Court. The statutory penalty for violation of the County Building Code and Zoning Regulations is a misdemeanor charge with a possible fine of up to \$100.00 or ten days (10) in County jail, or both, for each day of each violation.

It is the intent of this office to assist and cooperate with landowners and residents of Adams County without imposing undue hardships. We have no discretion in this matter however, if you fail to comply with the Building Code and Zoning Regulations.

Any questions regarding this notice should be directed to Larry Haynie, Chief Building Official, between 8:00 a.m. and 4:30 p.m., Monday through Friday, at 853-7150.

Sincerely, Stevenlouson

2-02,1.b - Building Permits

Generally, a building permit is required to construct a building or structure; place a building or structure; remodel a building or structure; construct an addition to a building or structure; modify a building or structure; construct, place, or modify a sign; excavate or fill land; construct oil and gas wells and appurtenant facilities; construct subdivision improvements including roads; construct a landfill; or modify the use of land or a structure.

SECTION 106 - PERMITS

106.1 Permits Required. Except as specified in Section 106.2, no building or structure regulated by this code shall be erected, constructed, enlarged, altered, repaired, moved, improved, removed, converted or demolished unless a separate permit for each building or structure has first been obtained from the building official.

106.4.4 Expiration. Every permit issued by the building official under the provisions of this code shall expire by limitation and become null and void if the building or work authorized by such permit is not commenced within 180 days from the date of such permit, or if the building or work authorized by such permit is suspended or abandoned at any time after the work is commenced for a period of 180 days. Before such work can be recommenced, a new permit shall be first obtained to do so, and the fee therefore shall be one half the amount required for a new permit for such work, provided no changes have been made or will be made in the original plans and specifications for such work, and provided further that such suspension or abandonment has not exceeded one year. In order to renew action on a permit after expiration, the permittee shall pay a new full permit fee.
